

USA Traction Therapy

Introduction

Chattanooga® is a brand of DJO Global®. DJO Global provides solutions for musculoskeletal health, vascular health, and pain management. Our products help prevent injuries, rehabilitate after surgery, injury or from degenerative disease, helping to enable patients to regain or maintain natural motion.

For over seven decades, Chattanooga products have helped contribute to positive treatment outcomes in hospitals, clinics, and home settings worldwide. We strive to lead the rehabilitation industry by example, and through continuous innovation, provide real world solutions for clinicians and their patients.

As one of the leading brands in rehabilitation, Chattanooga is sold in over 80 countries worldwide. Chattanooga dealers, distributors and customers are supported by a seasoned team of personnel who oversee product development, product training and education, order placement, product delivery, after sales service, and provide dedicated sales and marketing support.

Please read complete instructions for use for all products prior to use.

Traction

Manual and mechanical traction has been utilized for years as a solution in the treatment of spinal conditions involving nerve root impingement and sagittal spine alignment. However, all mechanical traction devices are not the same. Chattanooga® Triton Traction systems offer a variety of choices to fit your clinic's needs.

With the Triton 6E and 6M, Chattanooga has introduced a new generation of innovative traction devices that mimic the intricate nuances of the manual therapist's hands, thereby expanding the features of modern day traction.

As a supplier of rehabilitation equipment, we see ourselves as a committed partner to the rehabilitation practitioner.

* GALAXY is a table name specific to DJO tables manufactured by MEDEN-INMED exclusively for DJO

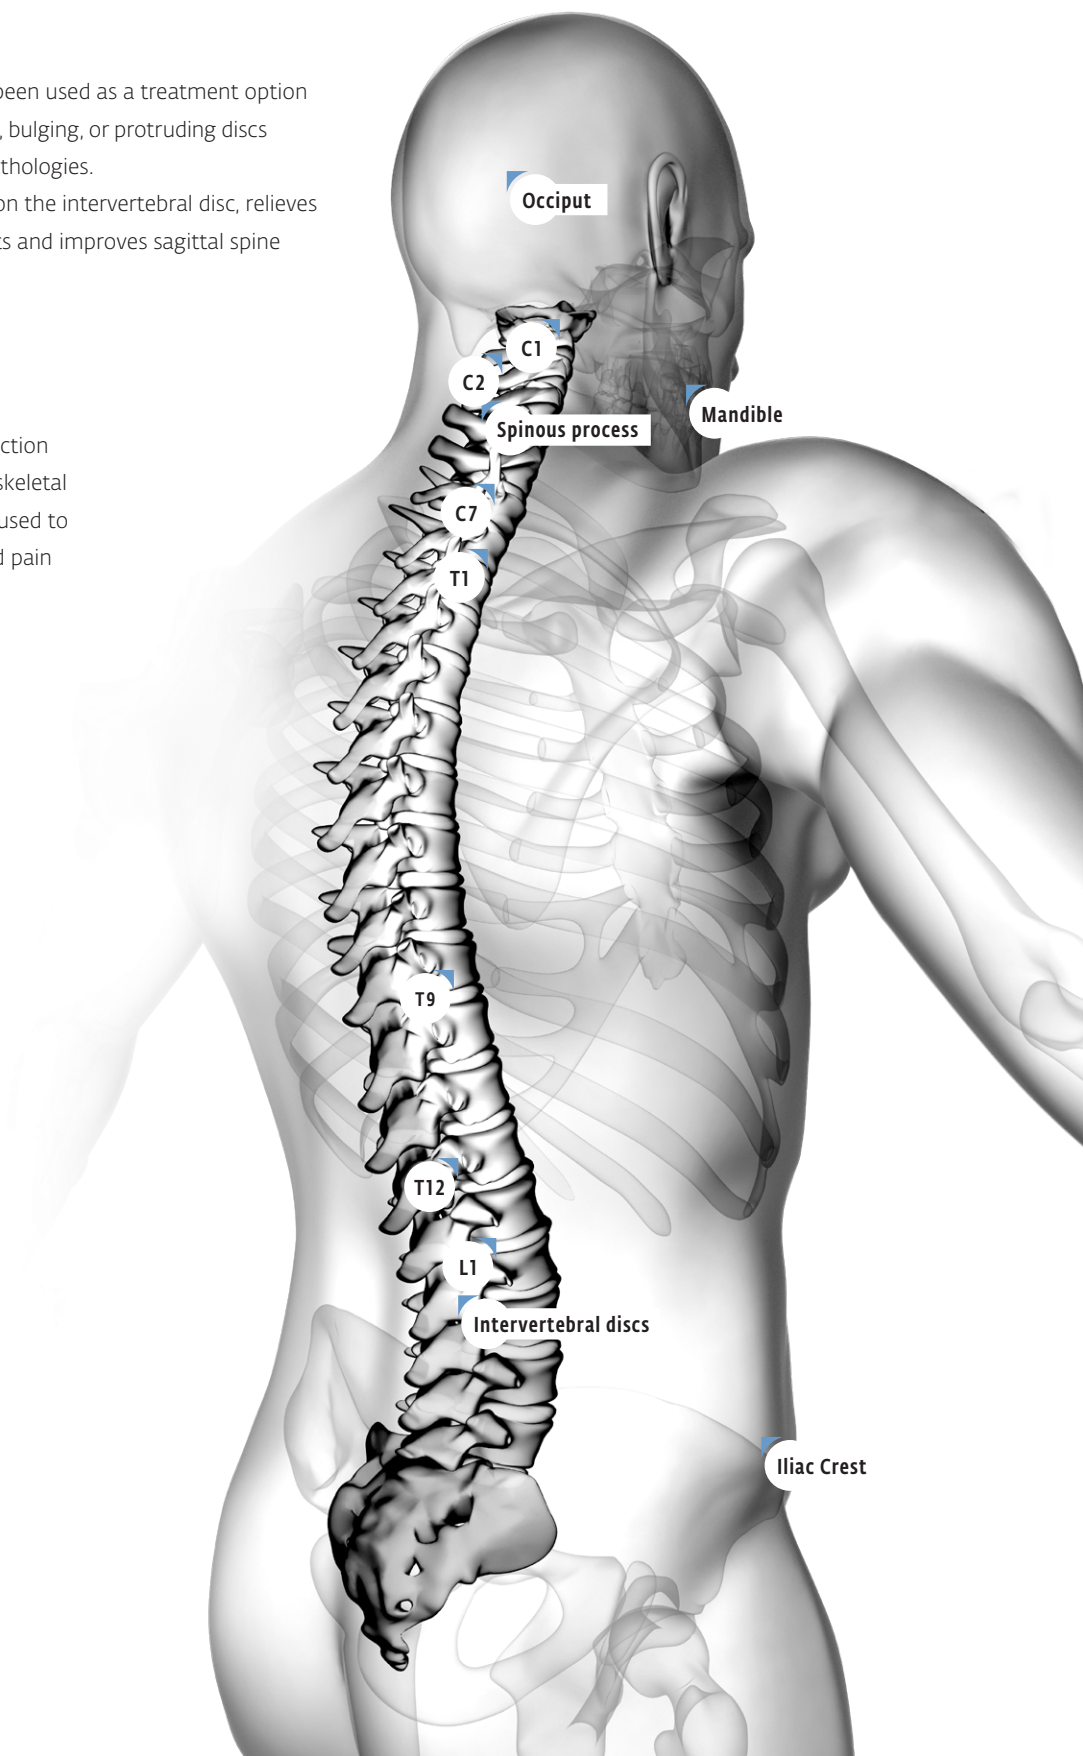

Traction treatment: a background

In modern medicine, spinal distraction has been used as a treatment option to relieve back pain resulting from herniated, bulging, or protruding discs associated with various spine injuries and pathologies. Stretching the spine helps reduce pressure on the intervertebral disc, relieves compression and irritation of the nerve roots and improves sagittal spine alignment.

Clinical Indications for Traction Therapy

The Triton® traction device helps provide traction and mobilization of skeletal structures and skeletal muscles. The Triton traction device may be used to help relieve peripheral radiation/sciatica and pain associated with:

- Protruding discs
- Bulging discs
- Herniated discs
- Degenerative disc disease
- Posterior facet syndrome
- Acute facet problems
- Radicular pain
- Prolapsed discs
- Spinal root impingement
- Hypomobility
- Degenerative joint disease
- Facet syndrome
- Compressions fracture
- Joint pain
- Discogenic pain

Ordering Guidelines:

What do I need to start Traction treatment?

For your patients to experience the full benefits of traction treatment therapy, it is important that you are equipped with the right tools for the job. We are here to help you choose the right equipment package for your needs.

1 Pages 5-8.

First, select one of our traction table models.

From the sophisticated Triton® 6E, to the straightforward Galaxy TTET300, Chattanooga® offers a range of traction tables to form the basis of your treatments.

EX: Part number: 4769M = Triton 6M Table

2 Pages 5-8.

Next, pick your table upholstery color.

Our tables come in a variety of upholstery color options, allowing you to coordinate your table with the look of your practice space.

EX: Part number: 4769M102 = Triton 6M Table, blue

Blue
(x = 02)

Black
(x = 08)

3 Pages 9-10.

Then, choose a traction unit.

Whether it's a color or monochrome display you're after, both of our traction units feature a touchscreen interface, and can be used with any of our table models.

EX: Part number: 4749 = Triton Traction unit, with color screen

4 Pages 11-13.

Finally, don't forget your accessories!

From flexion stools to bolster sets, we supply everything a practitioner could need to make the traction treatment process that little bit easier.

EX: Part numbers: 3265106 = Flexion stool, blue + 42901 =

Bolster Set + 2825 Quikwrap DTS Belt Set

Triton® 6E Traction Table

Intuitive remote hand control for all moving parts

Pelvic tilt section (0° to 20°)

Repositional headpiece (-30° to +40°)

Foldaway grab bar

Adjustable arm rests (-30° to +40°)

4 retractable feet/casters

Safety Key

Features

In modern medicine, spinal distraction has been utilized as a treatment option to help relieve peripheral radiation/sciatica and pain associated with various spine injuries and pathologies.

With more than 40 years of experience in the service of clinicians worldwide, Chattanooga® introduces its next generation of spinal distraction treatment systems. Consisting of a three-tier portfolio, our latest range of traction tables includes the highly-functional Galaxy traction line, the mid-range Triton 6M, and the optimum product in the series, the Triton 6E.

Sporting a selection of sophisticated features, the Triton 6E employs modern technology to help put the clinicians in total control with the the touch of a button. Fully electric and highly adjustable, when combined with one of our Triton traction units, this premium table helps provide the best possible support for practitioners looking to push their traction treatment to the next level in innovation.

- One of the most advanced electric traction tables, powered by 6 modern actuators, assist in friction-free movement of head, pelvic, chest and leg sections
- Ideally positioned hand remote control allows for easy access around the table
- 6-section treatment table to provide maximum patient comfort in prone and supine positions for manual and traction therapy
- Pelvic tilt section can be adjusted from 0° to 20° to aid flexion of lumbar spine and to help address pelvic asymmetry
- Head piece can be repositioned from -30° to +40° to allow easy access to thoracic and cervical spine
- Atmospheric LED light system in table frame, with cycling or fixed modes
- Tuck-away grab bars for hanging traction without thoracic restraint
- Heated cushions provide greater patient comfort
- Easy to transport and secure once in place
- Complete range of accessories to suit every patient need

Triton® 6M
Traction Table

Features

Comprised of 6 sections, the Triton 6M traction table uses a combination of gas springs and electric power to aid manual adjustment, allowing for easy control of table positioning. Each section is adjustable, providing a wealth of achievable patient positioning options. Together with a Triton Traction Unit (see pages 9-10), the Triton 6M is a solid choice for the basis of any therapist's practice.

- 6-section treatment table provides maximum patient comfort in prone and supine positions to aid manual and traction therapy
- Pelvic tilt section can be adjusted from 0° to 15° to aid flexion of lumbar spine and to help address pelvic asymmetry
- Head piece can be repositioned from -15° to +40° to allow easy access to thoracic and cervical spine
- Tuck-away grab bars for hanging traction without thoracic restraint
- Leg section is adjustable from 0° to 45°
- Gas springs assist in friction-free movement of head, pelvic, chest and leg sections which are easily accessible from either side of the table
- Foot/hand controller allows easy adjustment of table height and includes a lockable safety mechanism
- Complete range of accessories to suit every patient need

Galaxy* TTET400 Traction Table

Features

The Galaxy TTET400 is a multifunctional 4-section traction table which, in conjunction with a traction unit, aids in efficient spinal traction treatment. The TTET400's roller-mounted surface helps prevent friction below the hips and legs, aiding in full traction force during vertebral treatment. In addition, because the rolling sections can be locked in place, this variable-height traction table can also serve as an additional treatment couch.

- A Scissor frame with four feet and four multidirectional, retractable wheels for easy transport
 - Provides maximum patient comfort in prone and supine positions to aid both manual therapy and traction therapy
 - Roller-mounted surface helps prevent friction below the hips and legs
 - Repositional head /back section elevates to 85°
 - Gas spring assists on friction-free moveable sections for easy positioning
 - HalloTronic™+ System enables electric high/low height adjustment from 22 to 40 cm with capacity up to 500 LBs
- * Optional Axilia post package for added stability for your patient. Must be added at the time of order.

Note: The table in this image has the optional Axilia Post Package

4766	EMG module includes:
- 48084	Patient Interrupt/EMG Indicator Switch
- 27321	EMG Leadwire
- 42192	DuraStick® Plus 5 cm Round Electrodes (4x)
- 42205	DuraStick® Premium 3 cm Round Electrodes (4x)
Triton Traction Unit w/ EMG	
4798	Triton Traction Unit with EMG (including EMG module, patient switch, and data card)
Technical Specifications	
Triton Traction Unit	
Mains Power:	100 - 240 V, 50/60 Hz
Power Consumption:	75 W
Current Consumption:	3.2 Amps Max
Weight:	30 LBS
Dimensions**:	18 x 9 x 18 inches
Electrical Safety Class:	Class 1, Type B
Safety Tests:	IEC/UL/EN 60601-1, IEC/EN 60601-1-2, CAN C22.2 No. 601.1-M90 w/A2 - Meets MDD 93/42/EEC, CE 0413
EMG Module	
Electrical Safety Class:	Class 1, Type BF
** Dimensions are listed as L x W x H	

Features

- Static, intermittent, and cycling traction
- Independent timers allow easy customization of traction pulls in progressive, regressive, and traction phases
- Variable speed motor (30%, 50% and 100%)
- Pretension step eases the patient into traction to help prevent muscle guarding and pretest patient's tolerance to traction force
- Clinical Protocols™ provided for both cervical and lumbar conditions
- Full color graphic library complete with visual tutorial of belting techniques, anatomical images and common pathologies
- Digital high resolution color touch screen that pivots 270°
- 80 User defined protocol slots
- Easily store treatment parameters, pain scales, and pain maps on Patient Data Cards
- Upgrade with the optional EMG module

TX™ Traction Unit

Features

TX Traction Unit

- Static, intermittent, and cycling traction
- User-defined hold, rest and treatment times
- 10 User-defined protocol slots to store customized settings
- Digital monochromatic touch screen interface that pivots 270°
- Easily store treatment parameters, pain scales, and pain maps on Patient Data Cards

Traction Accessories

Features

A QuikWrap DTS Belt Set

- Universal fit, for use with pelvic or lumbar traction applications up to 300 LBs

B Knee Bolster

- Provides optimum body position to aid in multiple treatment applications.

C Kaltenborn Wedge

- For use by professionals trained in manual mobilization techniques.

D Wedge (1 per pack)

- Flat surfaced positioning shapes in two sizes 11.8x15.7x4.7 or 19.7x13.7x7.9 inches

E Round Bolster

- Rounded positioning shape in one size: 23.6x6 inches

G Facial Pillow

- Supports the head and neck of the patient for more comfortable traction sessions

H Pneumatic Stools

- High-quality, therapy stools with 60 Kg/m³ foam density swivel seat, supports 330 LBs

I Traction Flexion Stool

- Adjustable height enabling placement of the patient's lumbar spine into a neutral or flexed position for increased comfort. Upholstery can be color coordinated to match traction table

J Pron Pillo®

- Elevates the head and shoulders for added comfort. The raised base helps allow patients in prone position to breathe more easily

K Stabilizer Pressure Biofeedback

- Consists of combined gauge and inflation bulb connected to pressure cell

L Axial Posts

- Removable axilla posts help provide additional fixation to the table, preventing slippage during supine traction

M Clinical Cervical Traction

- This clinical device is designed specifically to aid in cervical traction. One size fits most

N Safety Key

- Removable personal safety key for table security and positioning.

Saunders® Cervical Traction

**Features**

- An alternative to surgery for some patients
- Traction forces are directed to the back of the head to help prevent compression of the TMJ
- Easy to read pressure gauge helps provide control of force
- Blow-off valve helps limit the amount of force that can be applied
- The Lumbar HomeTrac's friction free surface ensures smooth motion

Effective

- A cost effective option to continuous clinical care
- Saunders Cervical Home Traction's innovative design replicates clinical traction and helps promote consistency of treatment
- The Cervical Home Traction's positioning alternatives allow varying treatment options for the clinician

Saunders® Lumbar Traction

- Patented pneumatic system helps ensure reliable force accuracy and leak-free performance
- The Lumbar HomeTrac's split table design and actively moving treatment surface replicates clinical traction and helps promote consistency of treatment

Easy to Use

- A portable treatment solution that helps increase patient compliance and satisfaction
- Patented self adjusting neck wedges ensure a good fit on the Saunders Cervical Home Traction
- Patented pump design incorporates a simple "click in place" mechanism
- Quick and simple patient set-up enables home traction without assistance
- Lumbar Home Trac's non-slip belts comfortably secure the patient to the device
